Profile

Software Developer with over 3.3 years of experience in building scalable and intuitive applications across iOS, web platforms and cross-platform (Flutter) ecosystems. Proficient in **React, Node.js, Firebase**, **SwiftUI** with hands-on experience in **AWS services** (Lambda, S3, DynamoDB, **Bedrock with Mistral & Claude models**) and **chatbot development using OpenAI**. Experienced with **Model Context Protocol (MCP)** for building context-driven systems.**EC-Council Certified Ethical Hacker (CEH)** with a solid foundation in security principles and frameworks. Passionate about **AI-driven technologies**, rapid prototyping, and **cloud-based architectures**. Highly motivated to contribute to innovative security and intelligence solutions. **Open to relocation.**

Professional Experience

2025/08 – Present
Bengaluru, India

Software Developer
FortunesoftIT Innovations

- Developing healthcare web applications using **React.js** with focus on responsive and user-friendly UI.
- Implementing modules like appointment scheduling, session workflows, and therapist dashboards.
- Integrating frontend with **Node.js & MongoDB APIs** for seamless data handling.
- Contributing to mobile features using **React Native**.

2025/03 – 2025/08
Bengaluru, India

Software Developer
Narrow Labs

- Leading a full-stack development team to build robust and responsive web applications using **React**, **Node.js**, **Python**, **TailwindCSS**, **HTML/CSS**.

- Designed and implemented scalable backend systems using **AWS Lambda**, **S3**, and **DynamoDB**, ensuring high availability and fault tolerance.
- Leveraged **AWS Bedrock (Mistral & Claude)** for **AI-driven** workflows and intelligent automation.
- Worked on **MCP (Model Context Protocol)** integration for context-aware AI applications.
- Mentoring developers and collaborating on CI/CD and API design.
- Worked closely with product managers and UI/UX designers for sprint planning and delivery.

2023/06 – 2025/01 **Software Engineer**
Bengaluru, India *Aptener Mechatronics*

- Developed and maintained robust iOS applications using SwiftUI and UIKit with scalable MVVM architecture.
- Integrated real-time communication using **Zego** and **Agora** SDKs.
- Implemented **Mapbox SDK** and SiriKit for enhanced geolocation and voice interaction.
- Collaborate cross-functionally with embedded teams on firmware-to-app integration.
- Built internal monitoring tools using **React**, **Node.js**, and **MongoDB**.
- Ensured secure data handling practices and participated in version-controlled Agile workflows.

2022/11 – 2023/05 **Programmer Trainee**
Kochi, India *Kovenantz Technologies*

- Built dynamic front-end interfaces using **Blazor** and **.NET**, with back-end integration.
- Worked with **RESTful APIs**, optimized backend logic and SQL queries for speed and scalability.
- Developed and consumed **RESTful APIs** for seamless communication between frontend and backend systems.
- Gained exposure to privacy-by-design principles while contributing to full-cycle software delivery.

Projects

🟦 iOS Projects

- **Smart Ride Companion App**
  Developed a connected mobility app integrating **Mapbox**, **Zego**, and **SiriKit** to allow users

to monitor ride data, issue voice commands, and stream real-time location and audio with embedded firmware.

- **Device Diagnostics Dashboard**
  Built an internal diagnostic iOS app using **CoreData**, **CoreAnimation**, and **UIKit** for analyzing and reporting hardware status via Bluetooth.

🟩 **Web Projects (React + Node.js)**

- **Healthcare Therapy Management Platform**
  Built a healthcare web application using React.js and Node.js to manage therapist-patient workflows. Implemented appointment scheduling, session management, rescheduling logic, waiting room flow, and role-based dashboards for therapists and admins. Focused on usability, performance, and responsive UI for real-time interactions.
- **Device Monitoring Dashboard**
  Full-stack app built with **React.js**, **Node.js**, and **Firebase** to visualize real-time data from connected devices. Integrated AWS services like **S3** and **DynamoDB** for storage and scalability.
- **AI Chatbot with OpenAI & Bedrock**
  AI Chatbot with OpenAI & Bedrock – Built a custom chatbot frontend in React and backend in Node.js/Python(lambda) using OpenAI GPT APIs and AWS Bedrock (Mistral & Claude models). Added support for contextual interactions, conversation history, and prompt tuning.
- **Auth & Role-Based Access Portal**
  Developed a secure admin portal using **Firebase Authentication** with role-based access control. Incorporated reusable React components and REST APIs using Node and Express.

Certification

- ✅ Completed **Certified Ethical Hacker (CEH)** course – EC-Council

Education

2018/08 – 2022/11
Calicut, India

Bachelor of Technology
Institute of Engineering and Technology University of Calicut(IETCU)
CGPA: 6.7

Technical Skills

- **Languages & Frameworks**:
  Swift, SwiftUI, UIKit, Kotlin, Objective-C, React.js, Node.js, JavaScript, HTML, CSS, C#, .NET, Python, Flutter
- **Mobile Development**:
  SiriKit, Mapbox, Core Animation, CoreData, Protobuf, Zego, Agora
- **Web & Full-Stack**:
  React.js, Node.js, MongoDB, Firebase, REST APIs, Blazor, Express.js

- **Cloud & DevOps**:
  AWS Lambda, S3, DynamoDB, Firebase Hosting, GitHub, Postman, Xcode, VS Code,AWS Bedrock (Mistral & Claude models)
- **Security & Compliance**:
  Basic knowledge of OWASP
- **AI & Bots**:
  OpenAI ChatGPT API,AWS Bedrock, MCP (Model Context Protocol), basic familiarity with Ollama & Gemini bots
- **Architecture & Tools**:
  MVVM, Modularization, Protocol-Oriented Programming, Agile/Scrum

Languages

- English - Malayalam - Tamil - Hindi
